Subject: Columbia Visit

Hi Mark,

It was a pleasure meeting you on your visit to Columbia. Its great to meet other people that work on emerging contaminants in the area.! :D

I think your suggestion on obtaining waters from two utility plants from the same source water is a great idea. It will help eliminate some variability when looking at the data.

I am going to contact the wilmington utility but could you remind me what was the other utility you mentioned at sermacs? And do you know anybody that might have contact with them?

Thank you!!
Susana
